Luis PDF: total-resonance comparison

Free proton. GENIE values are nb/sr/GeV; Luis's PDF leaves the y-axis unit unlabeled. Luis traces are extracted from the PDF vector paths.

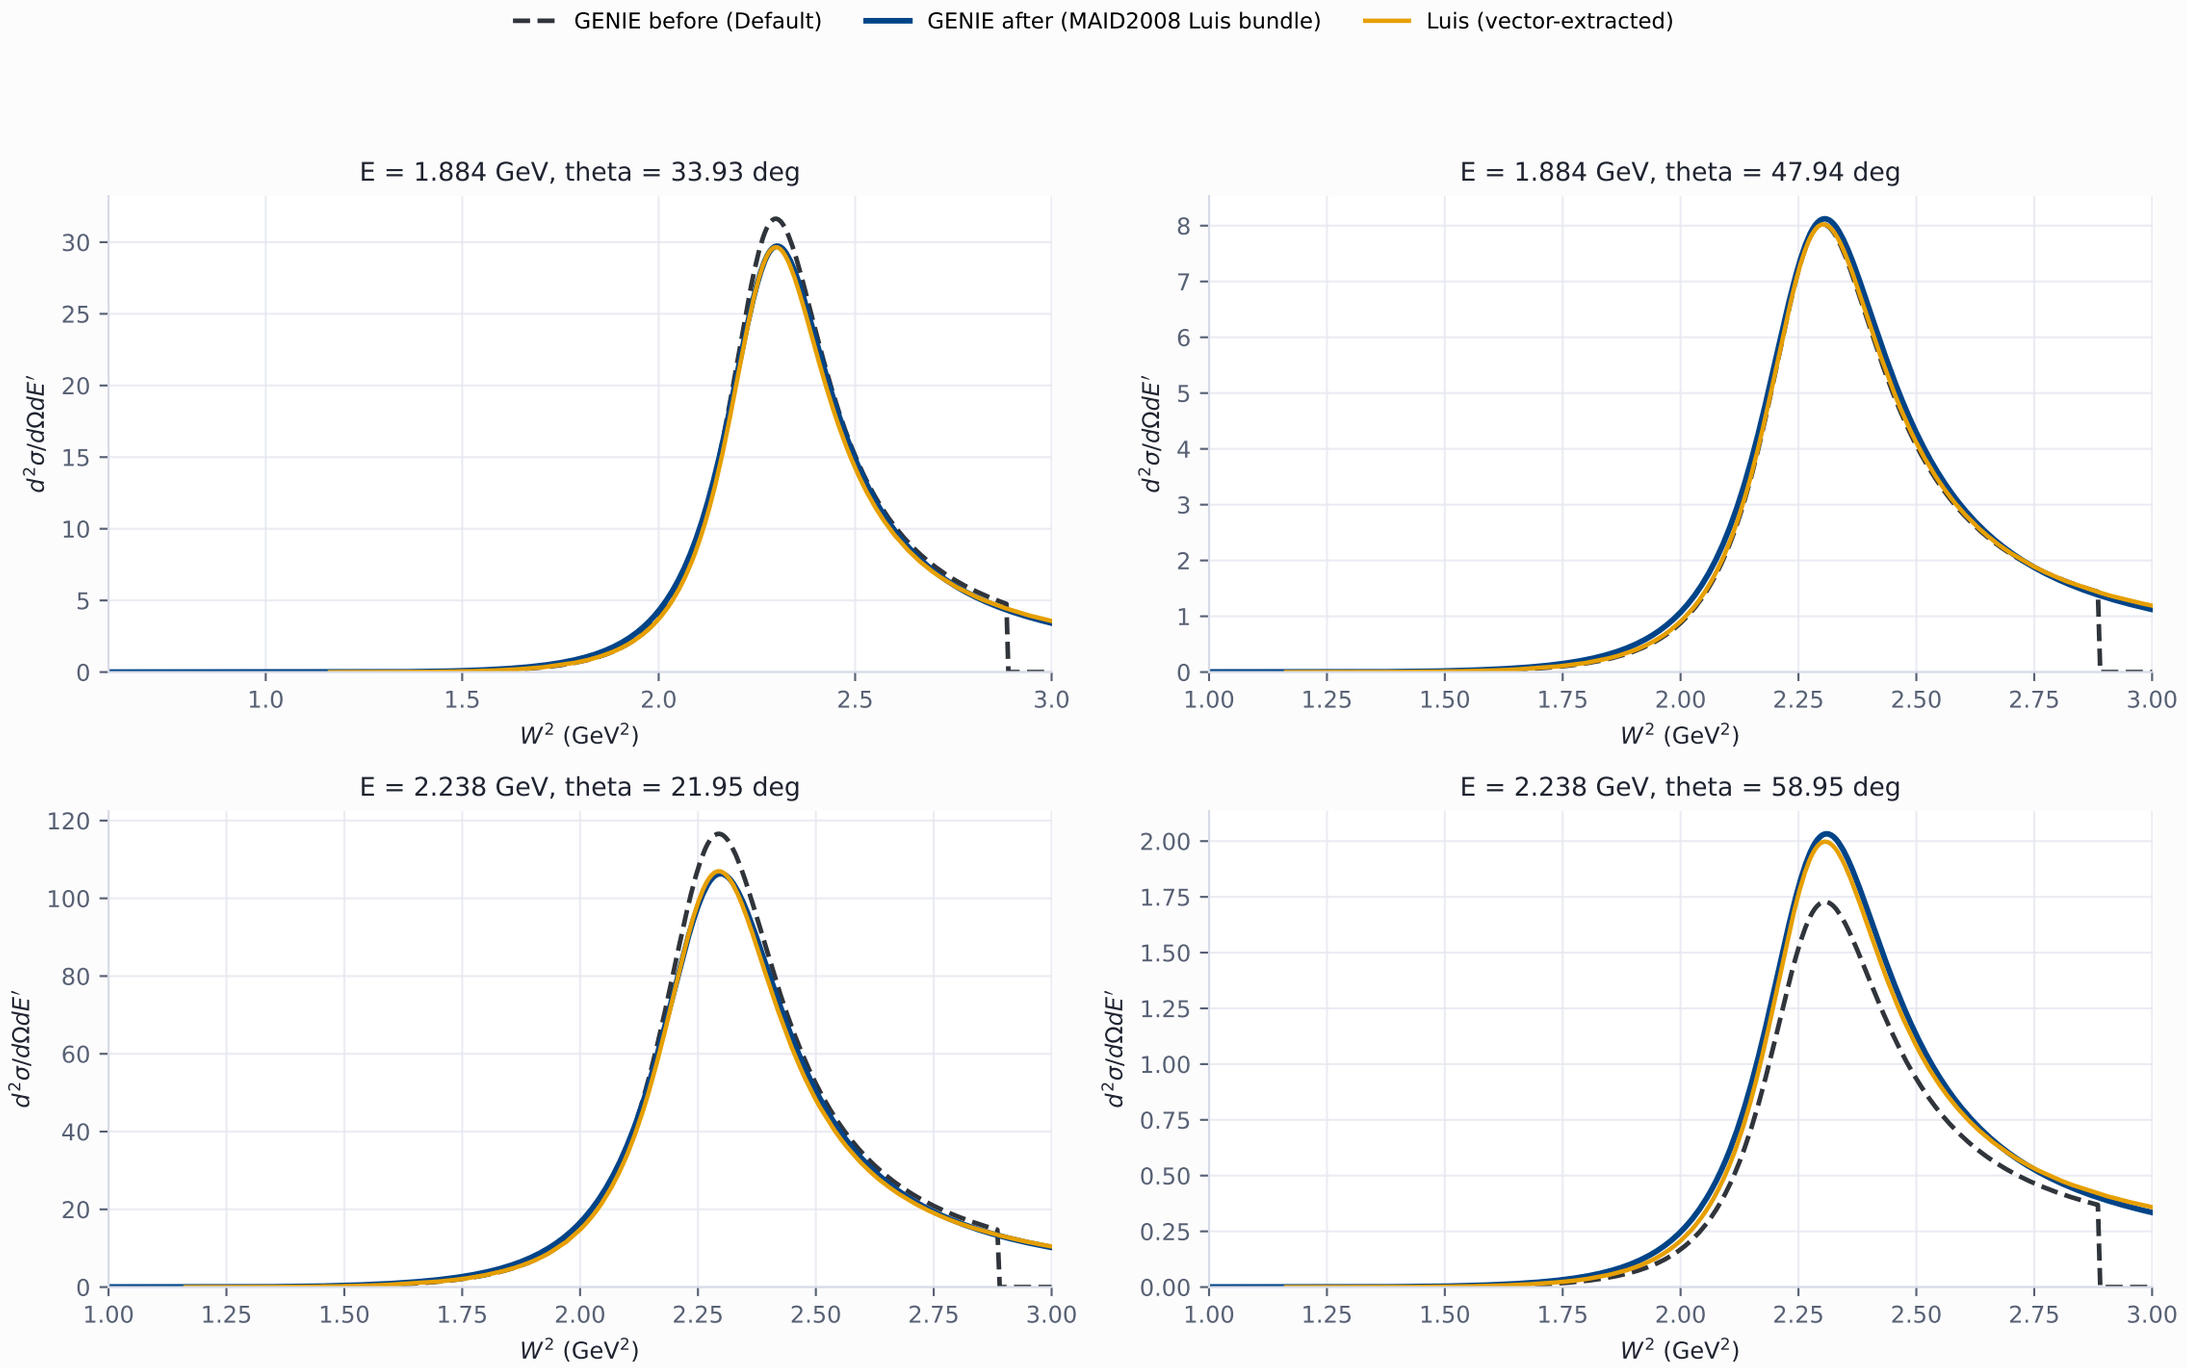

Luis PDF: P33(1232) contribution

GENIE before is its unchanged default. Luis's PDF path coordinates are extracted directly; no numerical table was supplied.

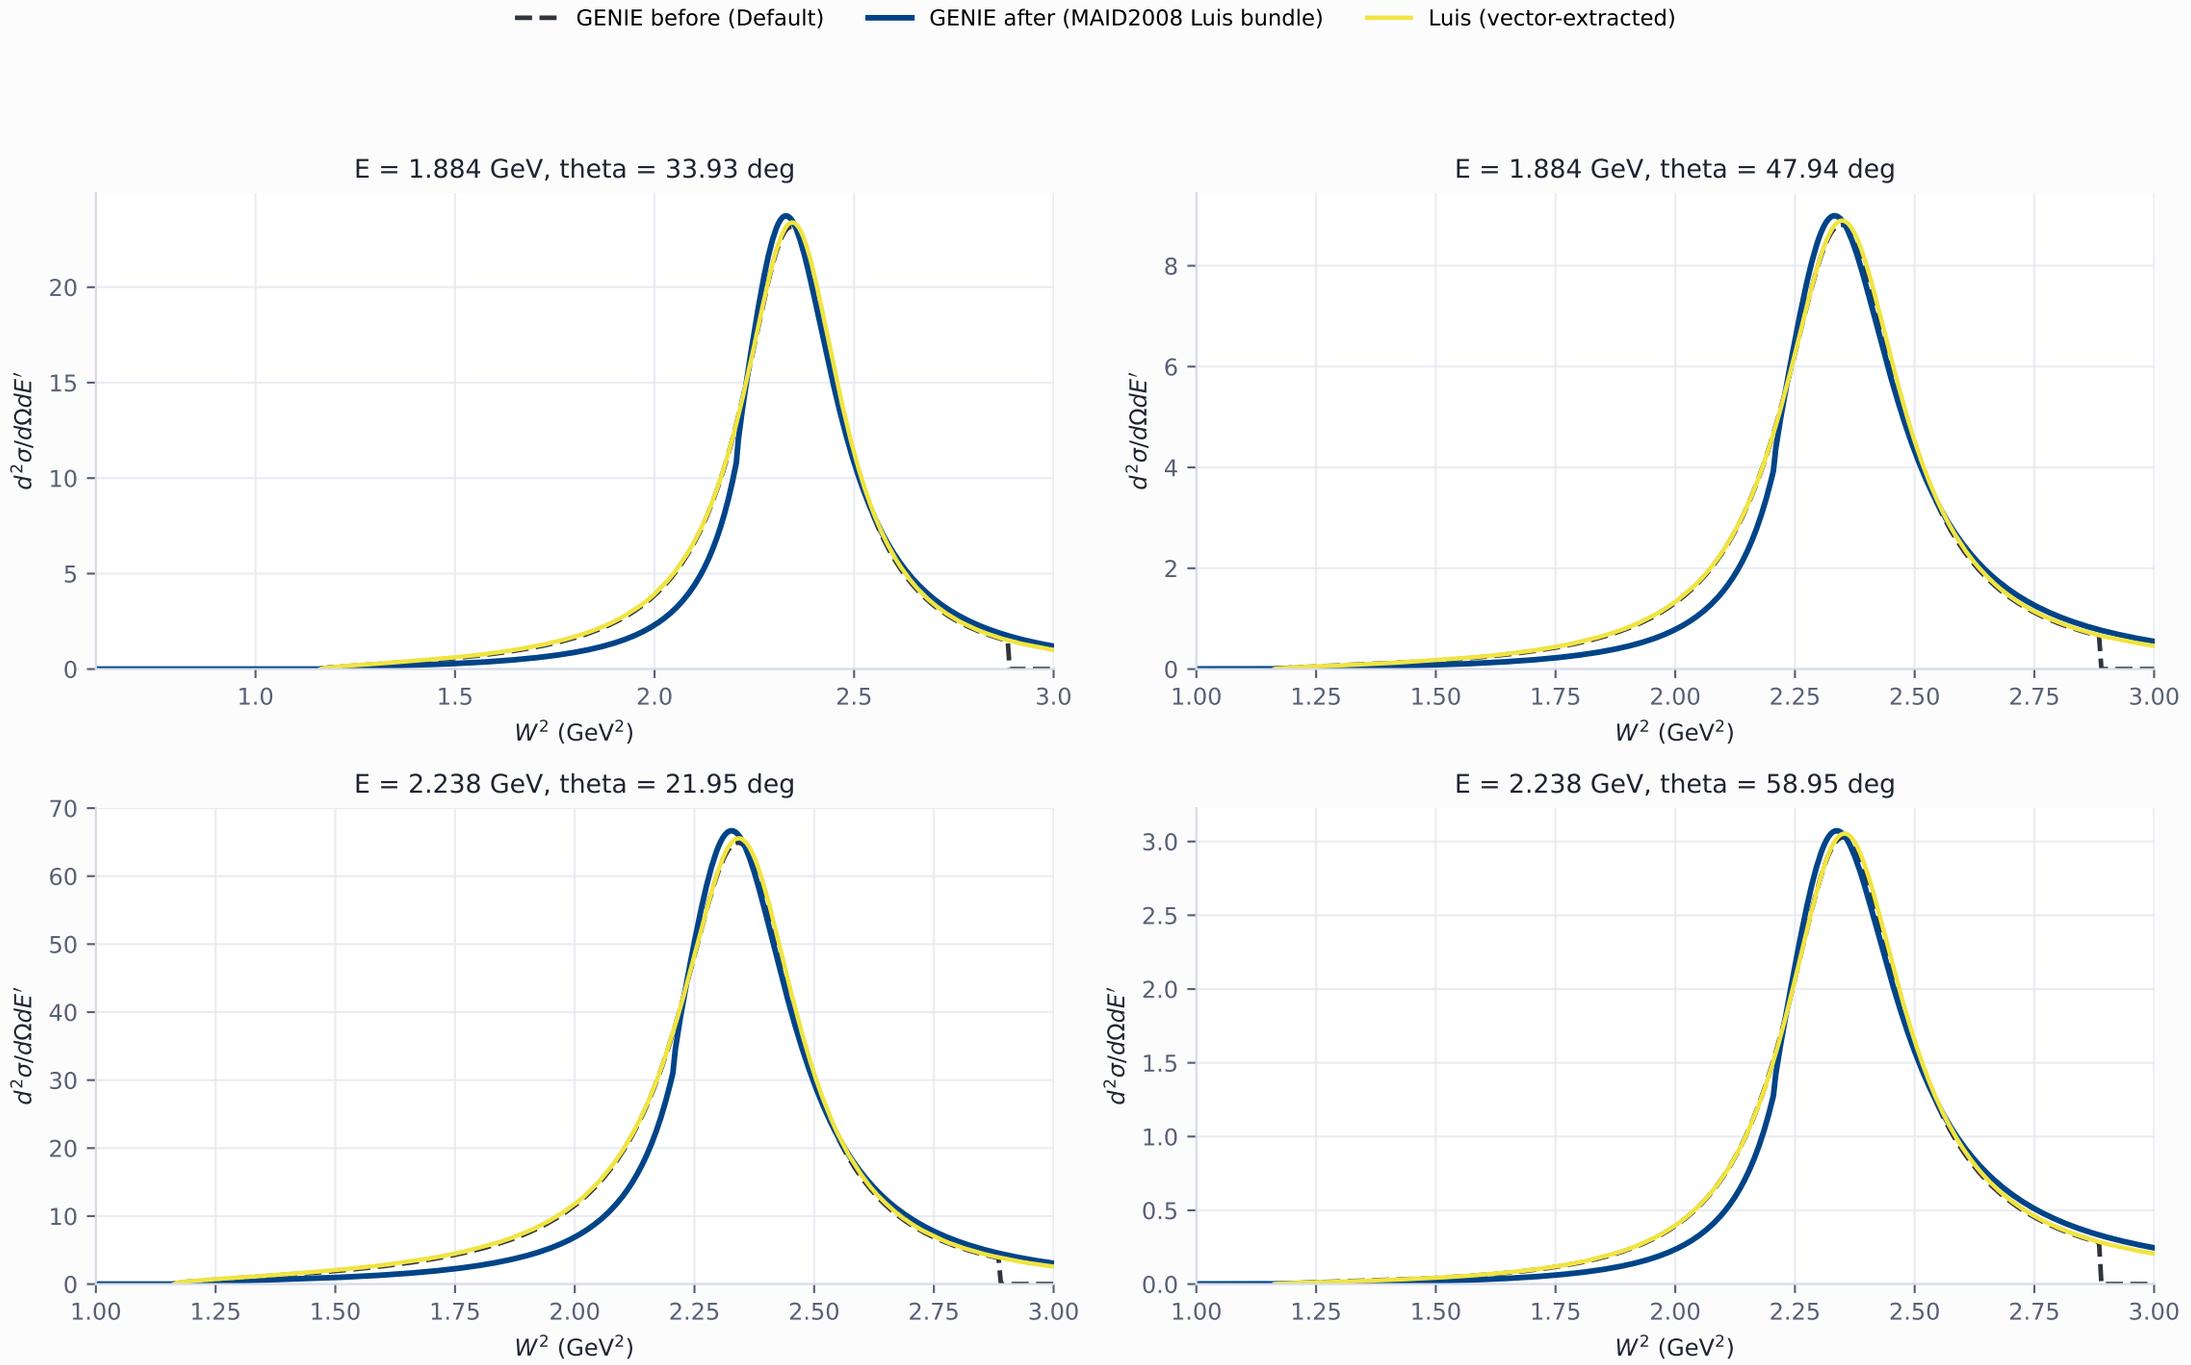

Luis PDF: D13(1520) contribution

GENIE before is its unchanged default. Luis's PDF path coordinates are extracted directly; no numerical table was supplied.

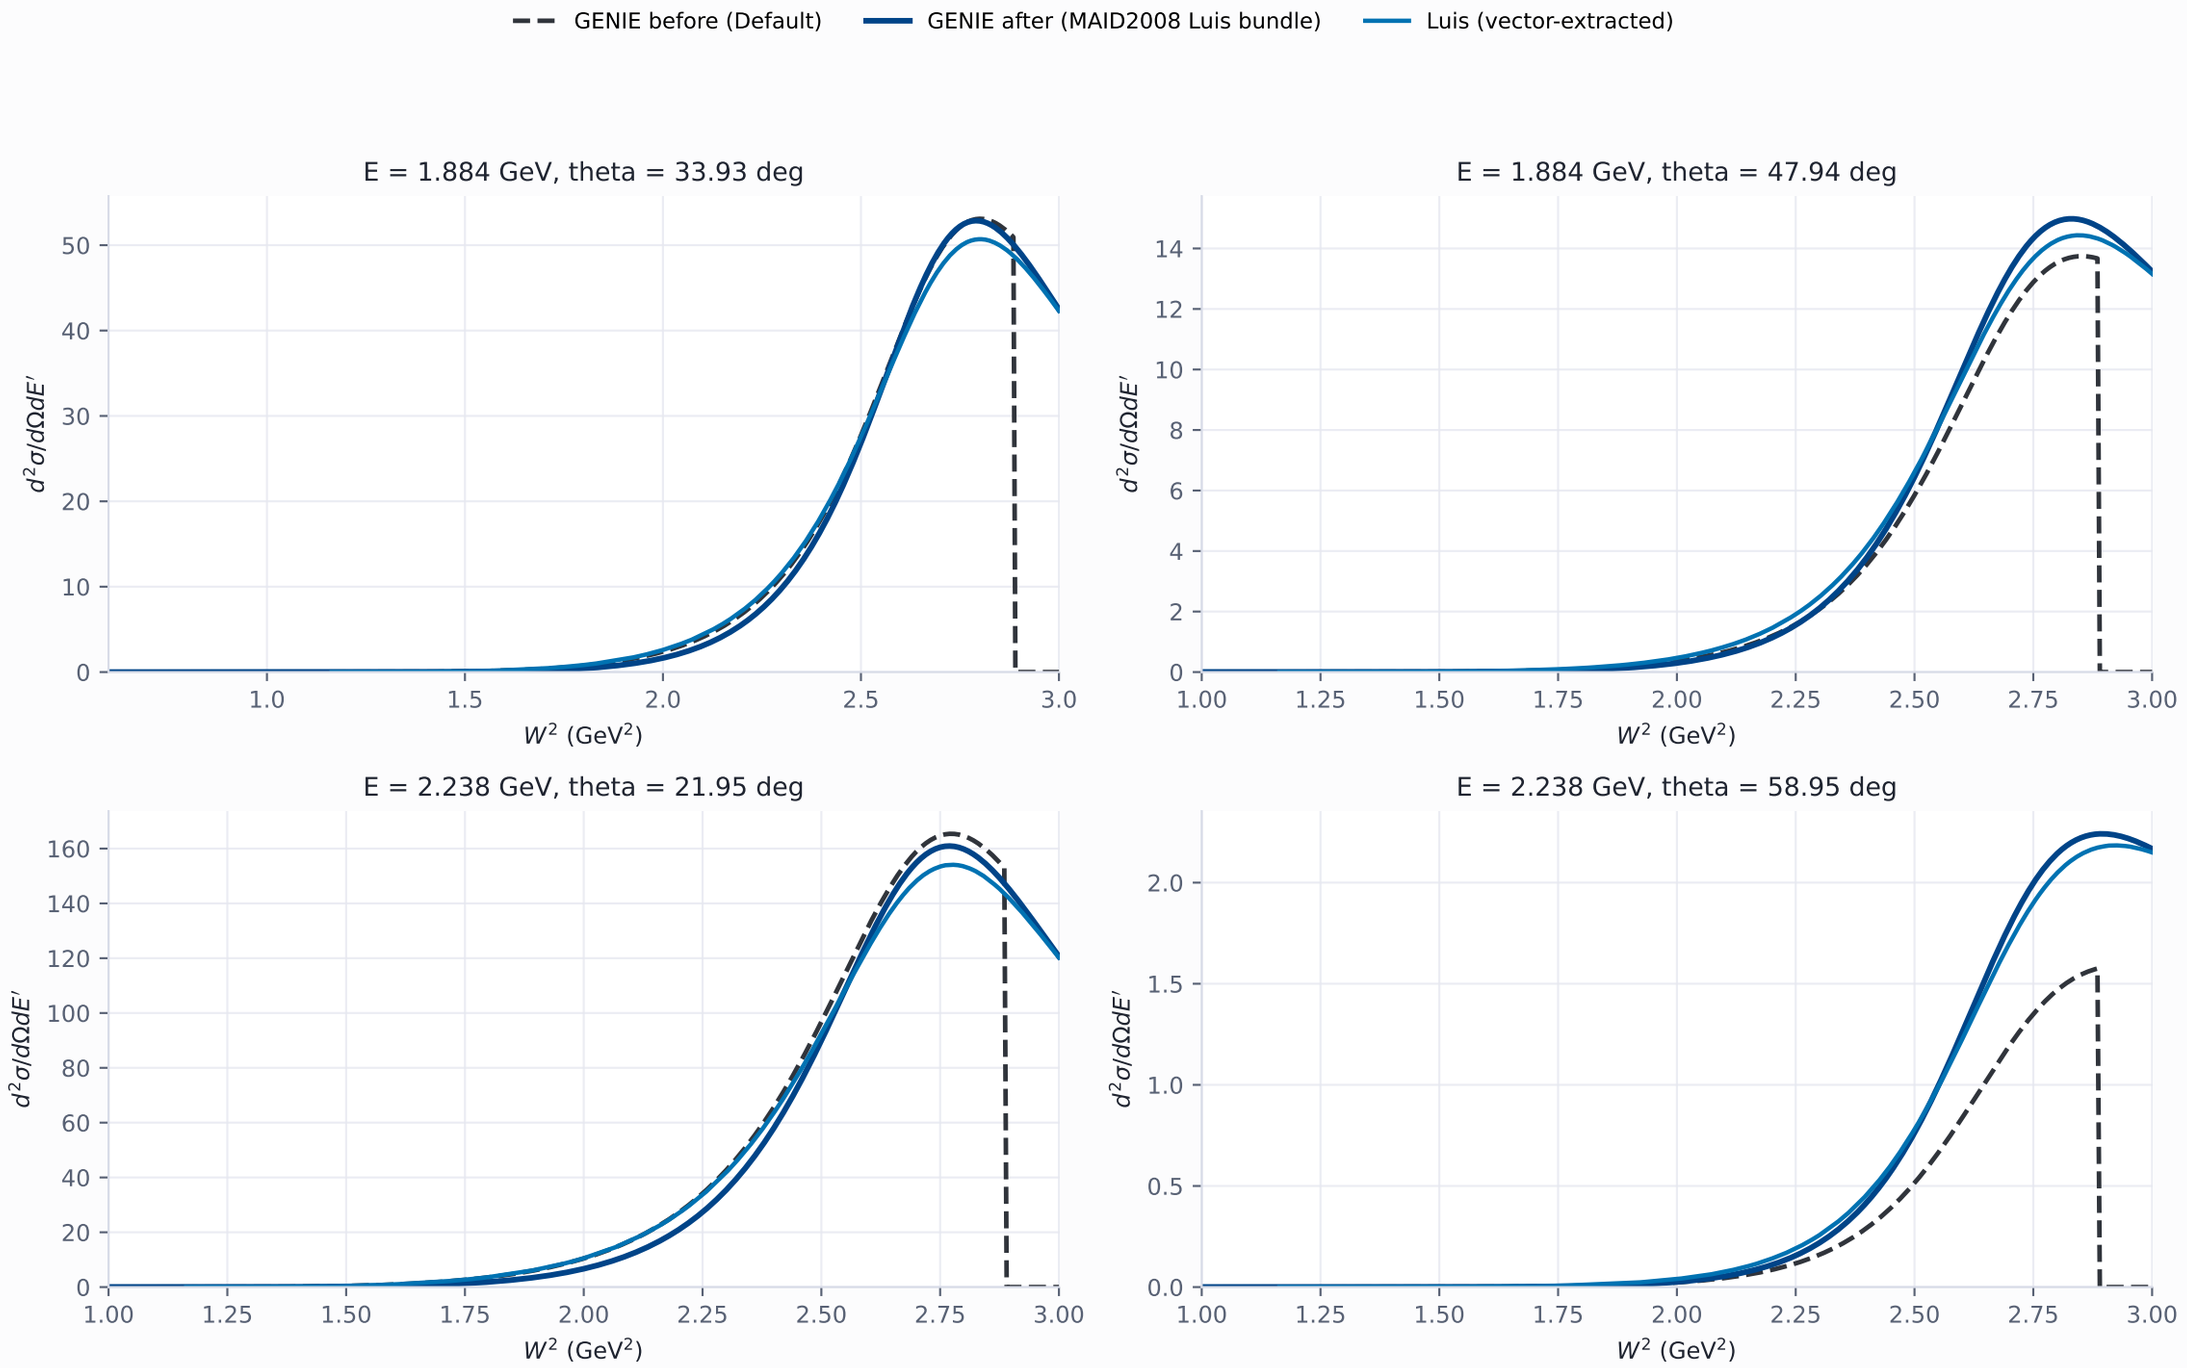

Luis PDF: S11(1535) contribution

GENIE before is its unchanged default. Luis's PDF path coordinates are extracted directly; no numerical table was supplied.

Luis PDF: D33(1700) contribution

GENIE before is its unchanged default. Luis's PDF path coordinates are extracted directly; no numerical table was supplied.

Luis PDF: P13(1720) contribution

GENIE before is its unchanged default. Luis's PDF path coordinates are extracted directly; no numerical table was supplied.
